MELVIN LUCAS

Software Engineer

SUMMARY

Creative, detail-oriented software engineer equipped with a diverse and promising skill-set. Proven track record of creating and implementing successful front and back-end web applications. Able to effectively self-manage during independent projects as well as collaborate as part of a productive team. Looking to bring my skills to a tech company with a global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices.
- Built semantically structured Fullstack web application.
- API development and integration.
- Coded software updates and alterations based on detailed design specifications

Recent Projects:

Goal tracker (Fullstack Web App) – Users can login to their profile and find their list of goals with timestamps for tracking completion. They can add new notes through an input, which they can then edit or delete all notes in their profile.

Mental Check (Fullstack Web App) –Users can log in find all information on mental health, journal, read articles, meditate and get a referral to get professional help.

GYMIT (Frontend Web App)- A React fitness app with the functionality to choose exercise categories and specific muscle groups ,browse more than three hundred exercises with practical examples, exercise details and pull related videos from YouTube.

Other Projects: Small Lakes Casino Virtual Slot Machine, Los Angeles, StarGazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more
